

From Tuesday 20th March to Sunday 2nd September 2007

Exhibition in three languages: French, English, Spanish

Cité des Sciences et de l'Industrie
30, avenue Corentin-Cariou

75019 Paris

Open from Tuesday to Saturday, 10.00-18.00
and Sunday, 10.00-19.00. Closed on Monday

Métro: Line 7, Porte de la Villette station

Buses: 75 - 139 - 150 - 152 - 249 - PC

Pay car park: entrance on Quai de la Charente.

1 - THE BASICS

Step into the nanoworld

An introduction to the properties of atoms and the physical laws that govern the nanoworld.

2 - TECHNIQUES

Manipulating atoms

To find out all about tools for exploring the nanoworld and how nanostructures are produced.

3 - USES

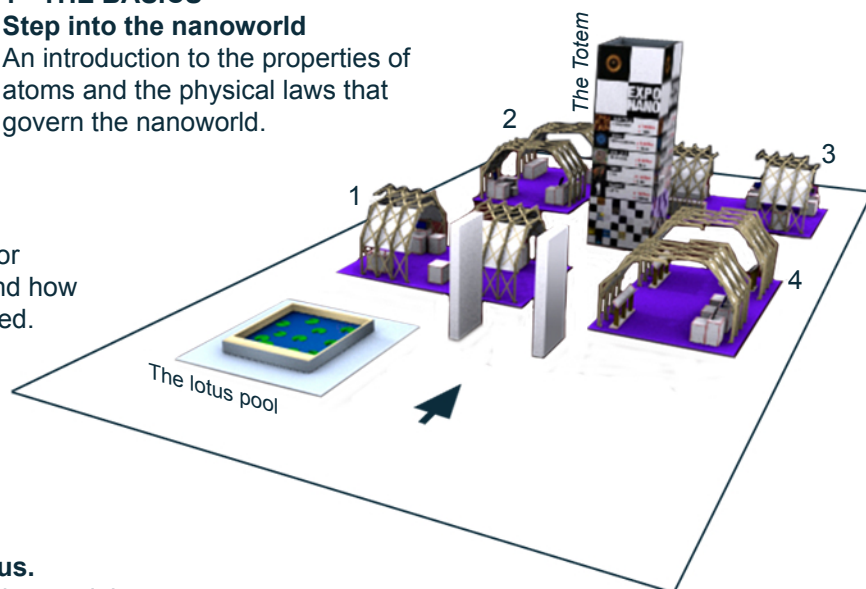

They are already among us.

An overview of existing and potential applications of nanotechnologies and their economic prospects.

4 - ETHICS

Does the future need us?

Thoughts about the ethical issues raised by the development of nanotechnologies and the viewpoints of experts.

THE TOTEM

Presentation of the CEA (Atomic Energy Commission), exhibition partner, and the conference "Nanotechnologies, taking stock of the debate" (Cité des Sciences, 19th and 20th March 2007).

THE LOTUS POOL

An example of a complex natural molecular structure: the self-cleaning leaves of the lotus.
