

# 2021-2022 CULTURAL SEASON

2020 IN FIGURES > **793,007** VISITORS TO THE MUSEUMS > **8,788,287** ONLINE VISITORS

**COMMITTED TO ACCESSIBILITY  
TO ALL FOR OVER 20 YEARS**

In 2021, the Cité des sciences et de l'industrie was awarded the Tourism and Handicap (T&H) mark for the fifth consecutive time. This quality rating was established in 2001 and is awarded for a duration of 5 years to tourist attractions that are committed to being accessible to all.

**INDEX**

- 6** Les Étincelles ("Sparks") du Palais de la découverte
- 10** New temporary exhibitions this season
- 16** Events
- 18** Temporary exhibitions open in spring and summer 2021
- 20** Permanent exhibitions
- 28** Open access resources
- 34** Touring exhibitions and events
- 36** Useful contacts

**INTRO**

**To celebrate its much anticipated reopening, Universcience has planned a rich and vibrant cultural season.**

Starting with **Les Étincelles du Palais de la découverte**, our temporary eco-friendly home located in the 15<sup>th</sup> arrondissement of Paris. The Palais has relocated to this colourful construction while renovation works are taking place, and we continue to carry out our mission here by offering presentations, workshops and shows at the planetarium.

As for the **Cité des sciences et de l'industrie**, visitors will discover *Jeans* and *Renaissances* exhibits in person. The firm intention of these exhibits is to question the sustainability of our choices. *E-lab season 2* explores the latest trends in video games, in terms of the different careers and technologies within the industry, while *the Biolab* a new demonstration area sees the day. In June 2022, the *Industrial Evolutions* exhibition will open its doors. This exhibition explores industrialisation and its impact on human life, through immersive installations.

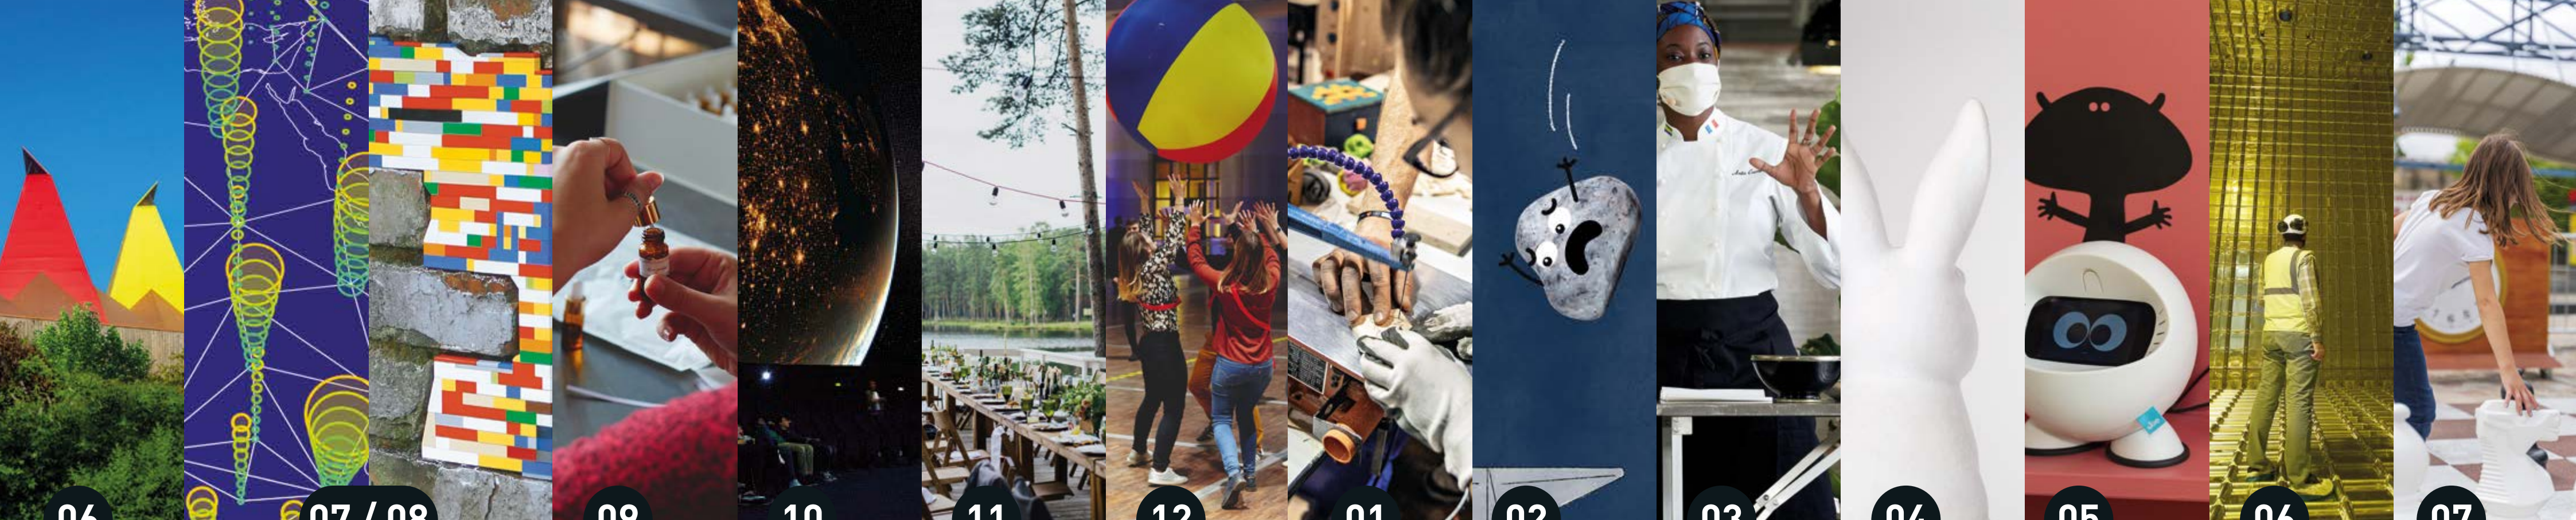

After the long months of lockdown, **this cultural season focuses on the idea of sharing**. This autumn, the Cité des sciences et de l'industrie puts the spotlight on a moment of celebration with *Banquet*, an exhibition that will bring visitors from the kitchen to the table. There will also be several events throughout the year: *Les Silencieuses (Silent Events)*, *Les Éclatantes (The Blinding Nights)*, *Mini Maker Faire*, and *the Festicités festival* will offer visitors experiences where they can enjoy being and doing something together.

In keeping with its mission, Universcience is aimed at everyone, from babies and toddlers onwards! After three years setting up its Lab, la Cité des bébés (Cité for Babies) will open its doors to babies and toddlers in June 2022, while *Fragile! (Fragile !)* a new exhibition for children aged 2-6 will open in February 2022.

This cultural season will be all about **togetherness and wonder**. It's an opportunity for Universcience to show that **in today's world, all roads lead to science**.

Bruno Maquart  
Chairman of Universcience

# LES ÉTINCELLES

Closed for renovation, the Palais de la découverte has crossed the Seine to take up residence in a temporary construction, comprising a planetarium and three interactive spaces. Here you will find exhibitions on chemistry, geoscience, physics, computer science and digital technology, life sciences, maths and astronomy.

Students of all ages, from primary school to university, will be able to journey through the solar system, understand how climate change works, discover matter in all its states as well as its interactions with light, observe mice communicating, uncover the mysteries of artificial intelligence and even make a journey to the heart of mathematics.

Individual visitors are welcome to visit on Wednesday afternoons, weekends and during zone C school holidays. They can enjoy the same exhibitions as school pupils, and will also be invited to try new interactive tools. They will regularly encounter scientists in the *A Researcher, an Experiment*.

• **The spaces at Étincelles of Palais de la découverte have been constructed under the principle of eco-design, supporting the circular economy.**

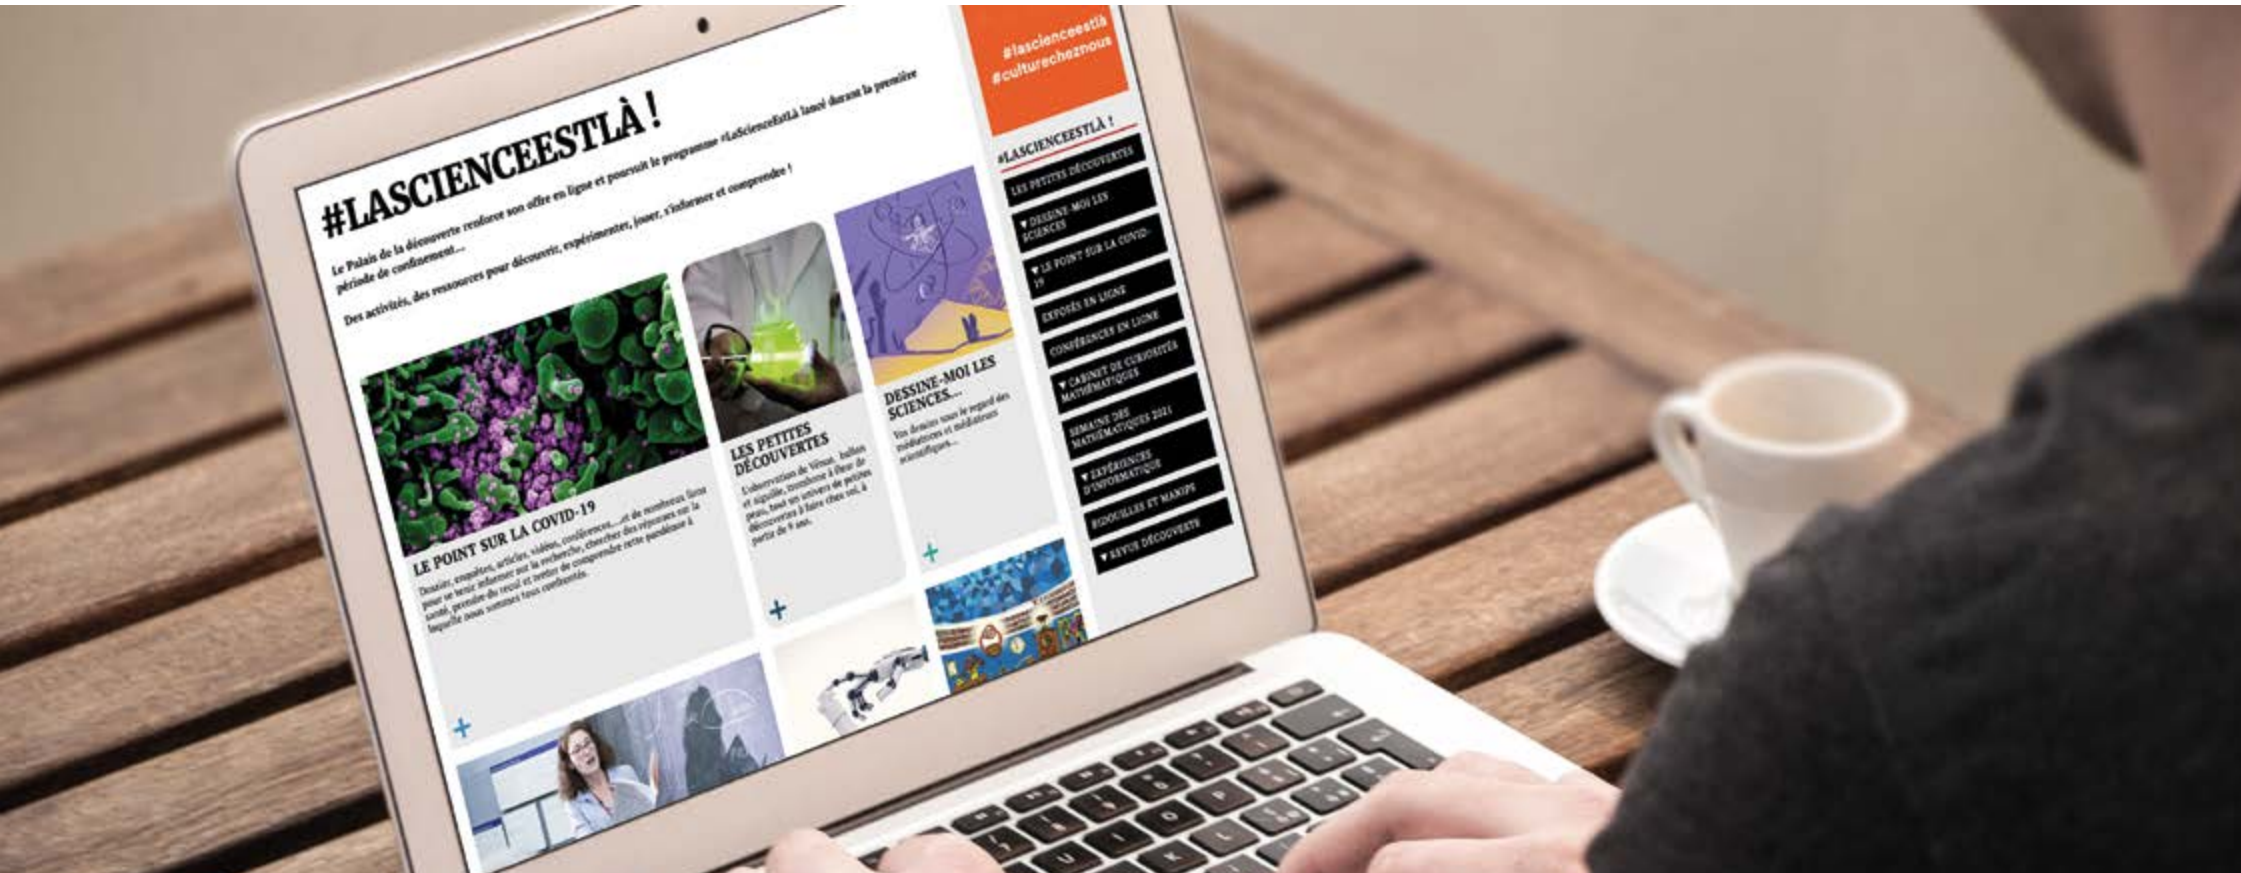

- The entire construction is made of wood.
- 90% of the materials used to create the internal fixtures are recycled or reused from the Palais de la découverte.

• With the support of Messer,  
• Garnot Computing,  
• SoftBank Robotics Europe  
• and Unistellar.

... THE PALAIS DE LA DÉCOUVERTE IS TRANSFORMING. FOLLOW THE PROGRESS OF THE RENOVATION, AND FIND US **ONLINE AND ACROSS FRANCE!**

TOURING EXHIBITION: FROM 19 MAY TO 14 NOVEMBER 2021 > CAP SCIENCES BORDEAUX • FROM 26 DECEMBER 2021 TO 4 SEPTEMBER 2022 > QUAI DES SAVOIRS, TOULOUSE

## THE PALAIS ON THE WEB

During the renovation works at Palais de la découverte, we invite you to visit our website and our social media pages. A recap on the history of the Palais, an overview of Étincelles du Palais de la découverte, touring exhibitions and new online scientific demonstrations... new content will be published regularly as we transition to a new Palais.

## CRITICAL THINKING, THINK AGAIN!

In order to think, understand and form an opinion, you need to be aware of the pitfalls associated with thought. The *Critical thinking, think again!* exhibition will help you to outsmart these pitfalls. You will be taken on a journey through situations from daily life, where you will discover illusions, misinterpretation, falsification and manipulation, both deliberate and unintentional...

TOURING  
EXHIBITION

Exhibition co-designed  
and co-produced by the Palais  
de la découverte, Cap Sciences  
and the Quai des Savoirs.

# NEW TEMPORARY EXHIBITIONS

2021-2022 **SEASON**

## BANQUET

A banquet is a celebratory meal, a party, a special occasion full of emotion, and a moment of togetherness, that can be found in all cultures. This exhibition invites you to discover the power of culinary delights: how to prepare, savour and share an incredible meal, in a wonderful moment of warmth and togetherness.

Your visit will begin in a kitchen where, as apprentice cooks, we will learn in an interactive way how to enhance foods, textures and flavours. It continues in a sensorial space where, through unique experiences, we will enhance our ability to taste, all while learning the science behind it. Next, it's time to sit at the table together to enjoy an immersive experience for all the senses, which takes us through the menu that has been cooked up for the exhibition by chef Thierry Marx and scientist Raphaël Haumont. Finally, the visit draws to a close with some insight into social sciences, taking a look at different cultures, periods and memoirs, helping to explain the meaning a banquet brings to a culture.

Online, a specially produced audiovisual production completes the exhibition, with an unusual interpretation.

16 NOVEMBER 2021  
07 AUGUST 2022 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In partnership with the INRAE  
(National Research Institute  
for Agriculture, Food and the  
Environment).

With the support of V. Mane Fils,  
Valrhona et Mademoiselle  
Desserts.

Program reference: *Shortcuts*  
(Chemins de traverse)

## FRAGILE!

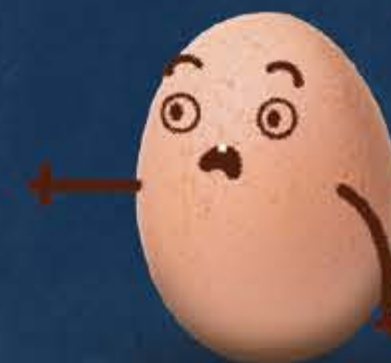

Aimed at children aged 2-6, the *Fragile!* exhibition is a fascinating story for little ones to explore. Our young visitors are invited to explore diversity, accompanied by fun characters along the way who each personify an aspect of fragility. Here they will discover how to handle something fragile and will also become aware of their own fragility.

Why not extend your visit by discovering our online collection of audio book podcasts, which you can listen to alone or with family.

19 FEBRUARY 2022  
8 JANUARY 2023 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

Program reference:  
*Curious Kids (Petits curieux)*

## INDUSTRIAL EVOLUTIONS

Industrialisation is an important issue for public debate. By both putting things into perspective and looking to the future, this exhibition explores the process of industrialisation over the long term, right up to the most recent developments in the digital world. With a range of experiences for all the senses, as well as immersive audio-visual installations, visitors can explore how industrialisation affects our lives today.

Online, you will find an interactive piece that accompanies the exhibition, which serves to decode our relationship with the industrial world.

7 JUNE 2022  
MARCH 2023 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In partnership with  
EHES (School for  
Advanced Studies in Social  
Sciences).

Program reference:  
*Societyscience / The way our world  
is changing. (Sociétés science/ Les  
mutations de notre monde)*

## Maker Faire Paris

From 26 to 28 November 2021 > Online

Universcience is pleased to host the *Maker Faire* for the 4<sup>th</sup> time, the largest event in the world dedicated to creativity, manufacturing and DIY. You will find workshops, displays and lectures.

## Mini Maker Faire 2021

31 July, 28 August, 25 September, 30 October, 27 November 2021 and 29 January, 26 February, 26 March, 30 April, 28 May, 25 June and 30 July 2022 > Cité des sciences et de l'industrie  
Mini Maker Faire provides a regular opportunity for makers and the general public to come together around various themes such as innovation, health and the environment.

# EVENTS 2021-2022 SEASON

## FESTICITÉ#11

### Cité of Senses 2: Smell

11 and 12 September 2021 > Cité des sciences et de l'industrie and online

The Cité of Senses event returns, this time on the theme of smell. Visitors are invited to put their noses to the test with the scents of "real" daily life. They will also discover the inner workings of the flavour and fragrance industry and the latest innovations in this area

## Sustainable Development Week

From 21 September to 3 October 2021 > Cité des sciences et de l'industrie

The *Water & Waste as You've Never Seen Them Before* learning trail, along with lectures, workshops and games, will help visitors understand the environmental issues we face, as well as various initiatives aiming to protect the planet. A program designed and produced in partnership with Astee (Scientific and Technical Association for Water and the Environment).

## Silent Events

26 August and 28 October 2021 and 24 February, 31 March, 28 April and 25 August 2022 > Cité des sciences et de l'industrie

Visitors are invited to enjoy a unique night, strolling around our spaces wearing a wireless headset. Choose a channel according to what you like to listen to, and enjoy a live DJ set. Also on the menu are exhibitions and scientific demonstrations for you to discover. For over 18s only.

## The Blinding Nights

17 December 2021 and 3 June 2022 > Cité des sciences et de l'industrie

Twice a year, just before the summer and winter solstices, the Cité puts on a special evening event for over 18s. With live music playing in the background, visitors can stroll through the different spaces, discovering unexpected animations and original demonstrations. A unique evening where innovations, experiences, performances and music come together.

## FESTICITÉ#14

### Time: Cocoon

22 and 23 January 2022 > Online

Biology, history, forecasting, astronomy, meteorology, cybernetics, sociology, sports...  
This new bi-annual festival will explore the various aspects of time. For this new event, the focus will be on immersing yourself in a "cocoon" where you can enjoy some time for yourself, for a gentle start to the year. In the program: board games, films, box sets, reading, sports and music, and other surprises.

## FESTIVE CITÉ#17

### Tête-à-tech 2

14 and 15 May 2022 > Cité des sciences et de l'industrie and online

Ever more subtle but ever more present, Tech occupies a little more space in our lives every day. This event, which is being staged for the second time, will include workshops, demonstrations, testing of new objects... and opportunities to meet the designers.

## FESTICITÉ#12

### Mob 1: Food

4 and 5 December 2021 > Cité des sciences et de l'industrie and online

During this "mob", visitors can learn and develop practical skills live, as a group and simultaneously, with the help of experts. This event, which is being staged for the first time, will come under the theme of food, in connection with the *Banquet* exhibition.

## To mark France's presidency of the European Union

December 2021 - June 2022 > Cité des sciences et de l'industrie

As France takes on the presidency of the Council of the European Union from 1 January to 30 June 2022, we have developed a program to put the focus on European culture. There will be several events throughout the year, with one special event, "European Views" by Science Actualités (Science News) running from January to March 2022, as well as a series of lectures from European experts in scientific culture (first half of 2022).

## FESTICITÉ#15

### Botanica 2

26 and 27 March 2022 > Cité des sciences et de l'industrie and online

A celebration of springtime, where plant lovers, expert botanists and anyone interested in botany are invited to discover the fascinating world of plants. Visitors will enjoy an original, immersive experience with stimulating workshops. It will be a unique opportunity to delve into the mysterious kingdom of plants... This festival is also the perfect opportunity to hold a food market right outside of the Cité, offering organic and local food to visitors, local residents and passers-by.

## PLUS

> Cité des sciences et de l'industrie

**The Foreshadowed Worlds Festival** > 8, 9, 10 October 2021

et industrie

## TEMPORARY EXHIBITIONS

OPEN SPRING AND SUMMER 2021

## JEANS

Jeans are the most worn item of clothing on the planet, with 73 pairs sold every second! Whether it's the blue fabric created in Nîmes or the clothing worn by Californian gold miners, the history of jeans is intertwined with that of the textile industry, protests and political movements, as well as fashion shows. But at a time when wearing jeans, which are by now ubiquitous, goes far beyond a fashion fad, the matter of how to produce them has become a crucial question: how can they be manufactured in large quantities, with a high level of quality and at an affordable price, all while protecting the environment?

Guided tours are available online throughout the exhibition.

UNTIL  
MAY 2022 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In scientific partnership with ADEME (the Ecological Transition Agency). With the support of the French Standardisation Association (AFNOR), Haute École Francisco Ferrer (HEFF), the French Institute for Textiles and Clothing (IFTH), ISKO, Marithé + François Girbaud, the Okayama Prefecture and Uniqlo.

Program reference: *Societyscience / The way our world is changing.* [*Sociétéscience/ Les mutations de notre monde*]

## RENAISSANCES

Pollution, climate change, over-consumption of resources and energy, pandemics, social inequality... the world today is under threat more than ever before. This situation provokes questions, expectations and hopes... What will tomorrow bring?

With its innovative subject matter and formats, *Renaissances* features a range of stories that are half-way between reality and fiction, and experiences that help us analyse our reactions and our ability to adapt in the 21<sup>st</sup> century. The exhibition utilises original narrative devices and predictions; fiction helps to evoke strong emotions in each visitor, freeing their imagination. The course of the exhibition oscillates between immersing you in possible scenarios of how the world could be, to areas where you can pause and reflect, for a moment of introspection.

Discover: online experience of the exhibition.

UNTIL  
MARCH 2022 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In partnership with Paris-Dauphine University-PSL.

Program reference: *Societyscience / The way our world is changing.* [*Sociétéscience/ Les mutations de notre monde*]

# PERMANENT EXHIBITIONS

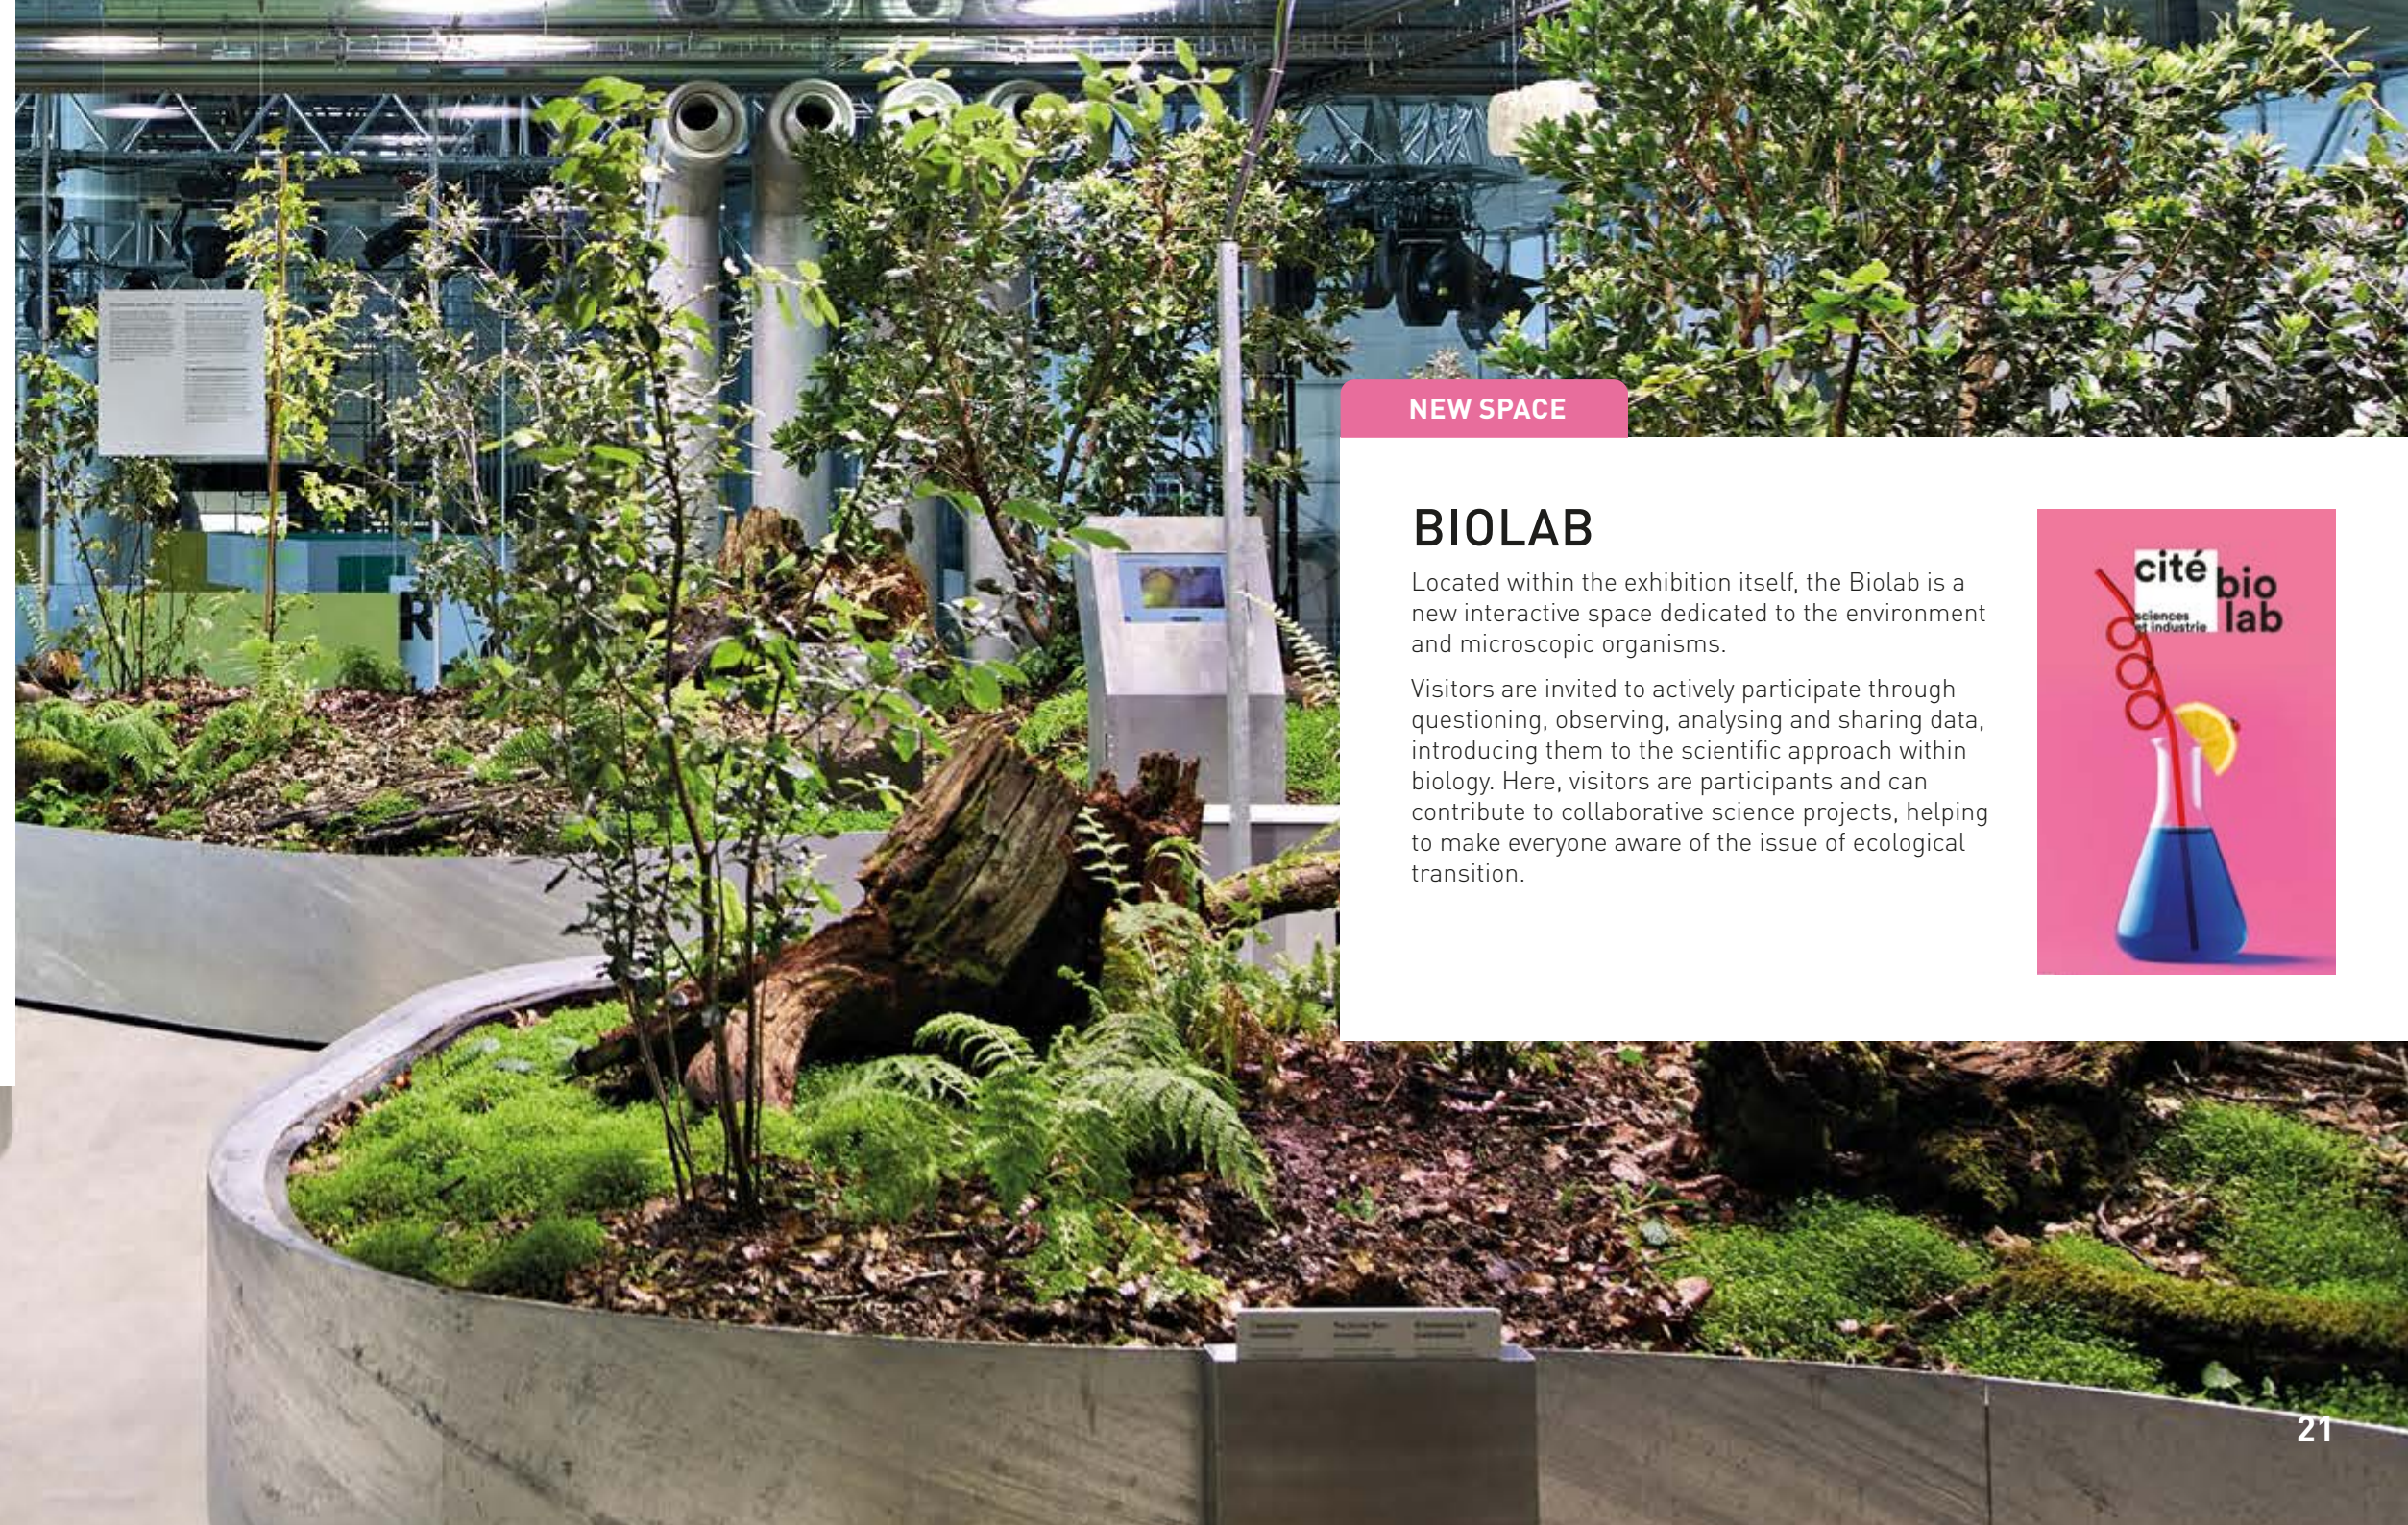

## BIO-INSPIRED ANOTHER APPROACH

We can learn an enormous amount from the living world. The organisms that make up this world have learned how to protect themselves, adapt to their environment and resist change. With the environmental challenges we face in the 21<sup>st</sup> century, the living world is an essential source of inspiration. The new permanent exhibition, *Bio-inspired, another approach*, which is presented in the greenhouse of the Cité des sciences et de l'industrie, is testament to this. Visitors will be immersed in three different ecosystems (a coral reef, a mangrove and a forest floor), where they will discover biomimicry, a scientific approach which takes inspiration from the living world to imagine a more harmonious and sustainable world.

FROM  
18 SEPTEMBER 2020 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In partnership with CNRS and INRAE. With the support of ADEME (the Ecological Transition Agency), AEV (Agency for Green Spaces in the Île-de-France Region), Ceebios (Centre for Studies and Expertise in Biomimicry), BNP Paribas Foundation and the OFB (French Office for Biodiversity).

Program reference:  
*Fresh science*  
(Attention, science fraîche)

## NEW SPACE

## BIOLAB

Located within the exhibition itself, the Biolab is a new interactive space dedicated to the environment and microscopic organisms.

Visitors are invited to actively participate through questioning, observing, analysing and sharing data, introducing them to the scientific approach within biology. Here, visitors are participants and can contribute to collaborative science projects, helping to make everyone aware of the issue of ecological transition.

## ROBOTS

Under this both evocative and intriguing title, you will find an interactive permanent exhibition that questions contemporary robotics.

Displaying 17 moving robots is certainly a real challenge, and it helps us to better understand the science and technology behind these modern machines. How do they work? What do they do? What can they achieve today and what will they be able to achieve in the future?

CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In partnership with  
CNRS (National Centre for  
Scientific Research).  
In collaboration with INRIA.  
With the support of Dassault  
Systems, Clemessy (Eiffage  
Energy Systems), Fanuc, Kuka,  
MathWorks, Schunk, Sick and  
SoftBank Robotics Europe.

Program reference:  
*Science and Society.*

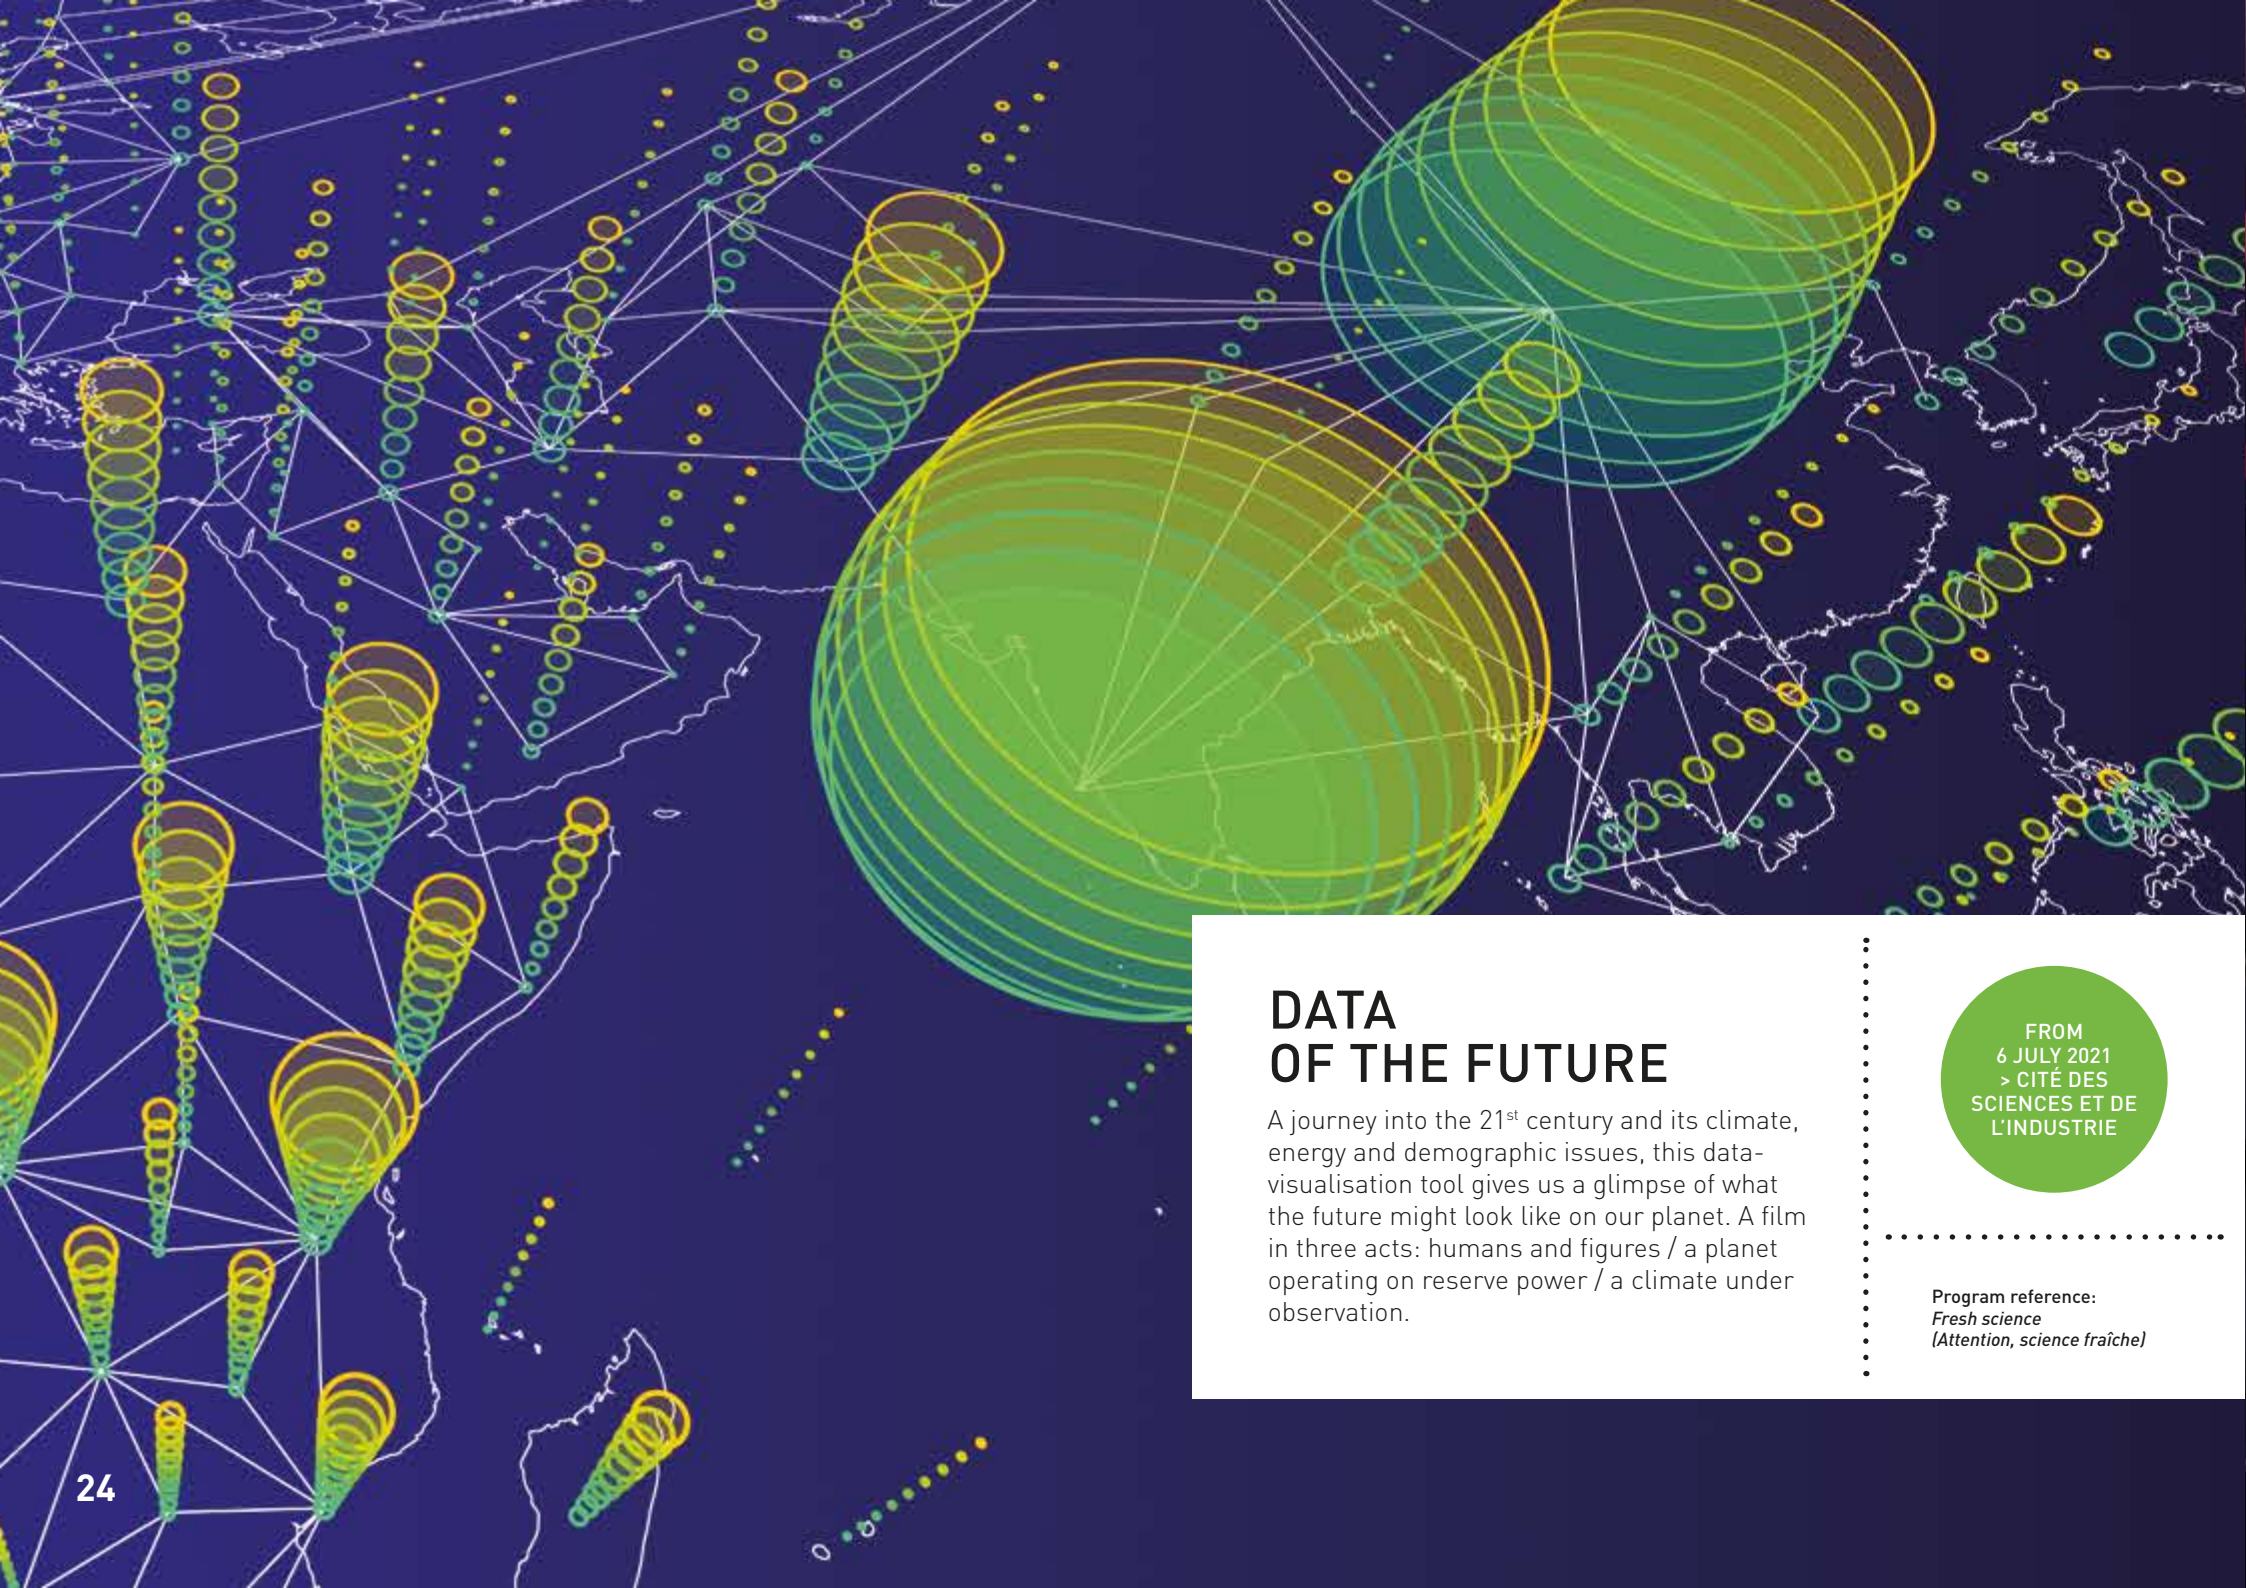

## VIDEO GAME e-LAB SEASON 2

Over the last ten years, the world of video games has seen great technological advancements, which have changed the way video games are played. Not to mention the emergence of new platforms such as mobile phones, new interfaces between man and machine and online gaming, which has given rise to many new forms of playing. *e-LAB* season 2 - *New Frontiers in Video Games* takes a look at these new and constantly evolving trends.

FROM  
19 MAY 2021 >  
CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

Program reference:  
*Shortcuts (Chemins de  
traverse).*

# DATA OF THE FUTURE

A journey into the 21<sup>st</sup> century and its climate, energy and demographic issues, this data-visualisation tool gives us a glimpse of what the future might look like on our planet. A film in three acts: humans and figures / a planet operating on reserve power / a climate under observation.

FROM  
6 JULY 2021  
> CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

Program reference:  
*Fresh science*  
(*Attention, science fraîche*)

# THE ARGONAUT UNDER THE OCEAN

This permanent exhibition located next to the *Argonaute* submarine offers a glimpse into the marine environment.

It uncovers what is involved in exploring and studying the marine environment: understanding the crucial equilibrium within the “engine of the ocean” and the issues related to geology, physics, chemistry and biology. The sea is fragile and suffers the consequences of human activity. Over-fishing, pollution and global warming all threaten the equilibrium that is essential for the marine environment and the planet. *Under the Ocean* educates young and old alike about these issues.

CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

In partnership with Amerami,  
Naval Group, Ifremer and the  
French Navy.

Program reference: *Science and  
Society.*

AFTER A TEST PHASE OF 3 YEARS,  
THE CITÉ DES BÉBÉS WILL OPEN IN JUNE 2022

# CITÉ DES BÉBÉS

The Cité des bébés is aimed at small children aged 0 - 23 months. After a test phase, it will be moving into a new space mid-2022. Designed to be like a safe and secure nest, it is centred on stimulation, sensory and motor development, and wellbeing for little ones. As we await the opening of its permanent space, the Lab de la Cité des bébés remains open until the end of 2021.

CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

Some of the Lab de la Cité des bébés workshops are available online.

# CITÉ DES ENFANTS

From the start, the Cité des enfants (for ages 2-7 and 5-12) has been a hit with all the family. It is so popular that it even gets all generations involved. Whatever their age, children come back time and again to play and satisfy their curiosity in these spaces, where they can play physical, cognitive and role-play games. In the age 2-7 area, the focus is mainly on activities where little ones can practise their fine motor skills, while kids in the age 5-12 area, who are in the process of constructing their identity, can take part in activities around body and image.

In partnership with MAIF.

CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

With the Cité des enfants workshop #àlamaison, you can access the Cité des enfants activities remotely.

# OPEN ACCESS RESOURCES

## BIBLIOTHÈQUE DES SCIENCES ET DE L'INDUSTRIE

La Bibliothèque des sciences et de l'industrie is an open access and free lending library, with a collection of 165,000 multi-media resources in the field of science and technology.

It is a local service that is open to all generations and in particular young people aged 15 - 25, supporting them in their education, whether that's for studying, resources for school work, advanced training or IT...

**The Youth Space** provides children and their parents with resources tailored to them, as well as demonstrations, workshops, comic book readings and storytelling...

**La Cité des métiers** - whose model has been replicated across France and abroad - all visitors can benefit from personalised advice, either on-site or remotely, about jobs, career guidance, training and setting up their own business.

**La Cité de la Santé**, professionals respond to all your questions about health (treatments, examinations, diagnosis or administrative processes) without appointment, on an anonymous basis and free of charge.

## CONFERENCES

Every year, almost 100 scientists come to meet the public at the Cité des sciences et de l'industrie.

To reinvent our future, we need to unearth new territories for the human imagination. That's what the "Stories" theme aims to do, which runs from September 2021 to January 2022. It is an opportunity to reflect on the way in which science follows the history of the Universe and of Humanity, and to discover how science itself creates great myths. In the manner of an alternate historian, visitors are invited to imagine how the world would have evolved, had a certain historical event or scientific discovery not taken place. Finally, several future scenarios will be predicted, in order to propel us into action and improve our resilience.

From February to June 2022, we take a look at the question of "Foods", exploring the link between food, pleasure and health, as well as the continual challenge of feeding a growing global population, while protecting against climate change and preserving natural resources. We will also discuss the intellectual nourishment provided by education and culture.

You can find all the lectures online, organised by theme: animals, the brain, evolution, fundamentals, heroes and heroines of science, time, health, society, technology and digital, earth and environment, the universe and... my first lecture: children's corner!

# CARREFOUR NUMERIQUE²

Discover, experiment and create together... We take a look at digital culture in a collective way, through innovative, interdisciplinary methods, based on a practical approach.

Throughout the year, this place invites visitors to understand, imagine, create and contribute to innovation, through its collaborative approach called Living Lab, its Fab Lab a place for digital development and its introductory workshops using digital tools.

The program is based on three themes: digital and technology, digital and society, and digital and the issues of the future.

The *Fab Lab at School* program continues its roll-out, providing an opportunity for pupils to explore new ways of learning based on “doing” and “collaboration”, which promotes individual responsibility and autonomy.

CITÉ DES  
SCIENCES ET DE  
L'INDUSTRIE

With the support of MathWorks,  
Armor and Dassault Systems.

Member of the French Network of  
Fablabs, FabFoundation  
and ENOLL.

# LE BLOB, ONLINE MEDIA FOR SCIENCE NEWS

An online source of science-based information, le Blob continues to grow. Its mission is to serve the general public, with its library of more than 4,000 videos on open access, free and ad-free. The content available (videos and articles) continues to expand, with the latest science and technology related news from France and across the world.

# SCIENCE ACTUALITÉS

In this multimedia museum space, which is updated twice a year with new themes, visitors to the Cité des sciences et de l'industrie can stay informed about the essential news in the world of science. With four topics per display, this exhibition space helps visitors to understand the issues related to the evolution of science and technology.

- The “Vues d’Afrique” film festival opens on 29 June 2021, and forms part of Universcience’s participation in the Africa Season 2020. Coordinated by the Lille School of Journalism, around thirty journalists have together drawn up the four “Topical issues”. As for the films, all produced by “Haut-Parleurs”, they are all the work of young professionals from the region, and provide a framework for new stories, from Maghreb in Sub-Saharan Africa to West Africa.

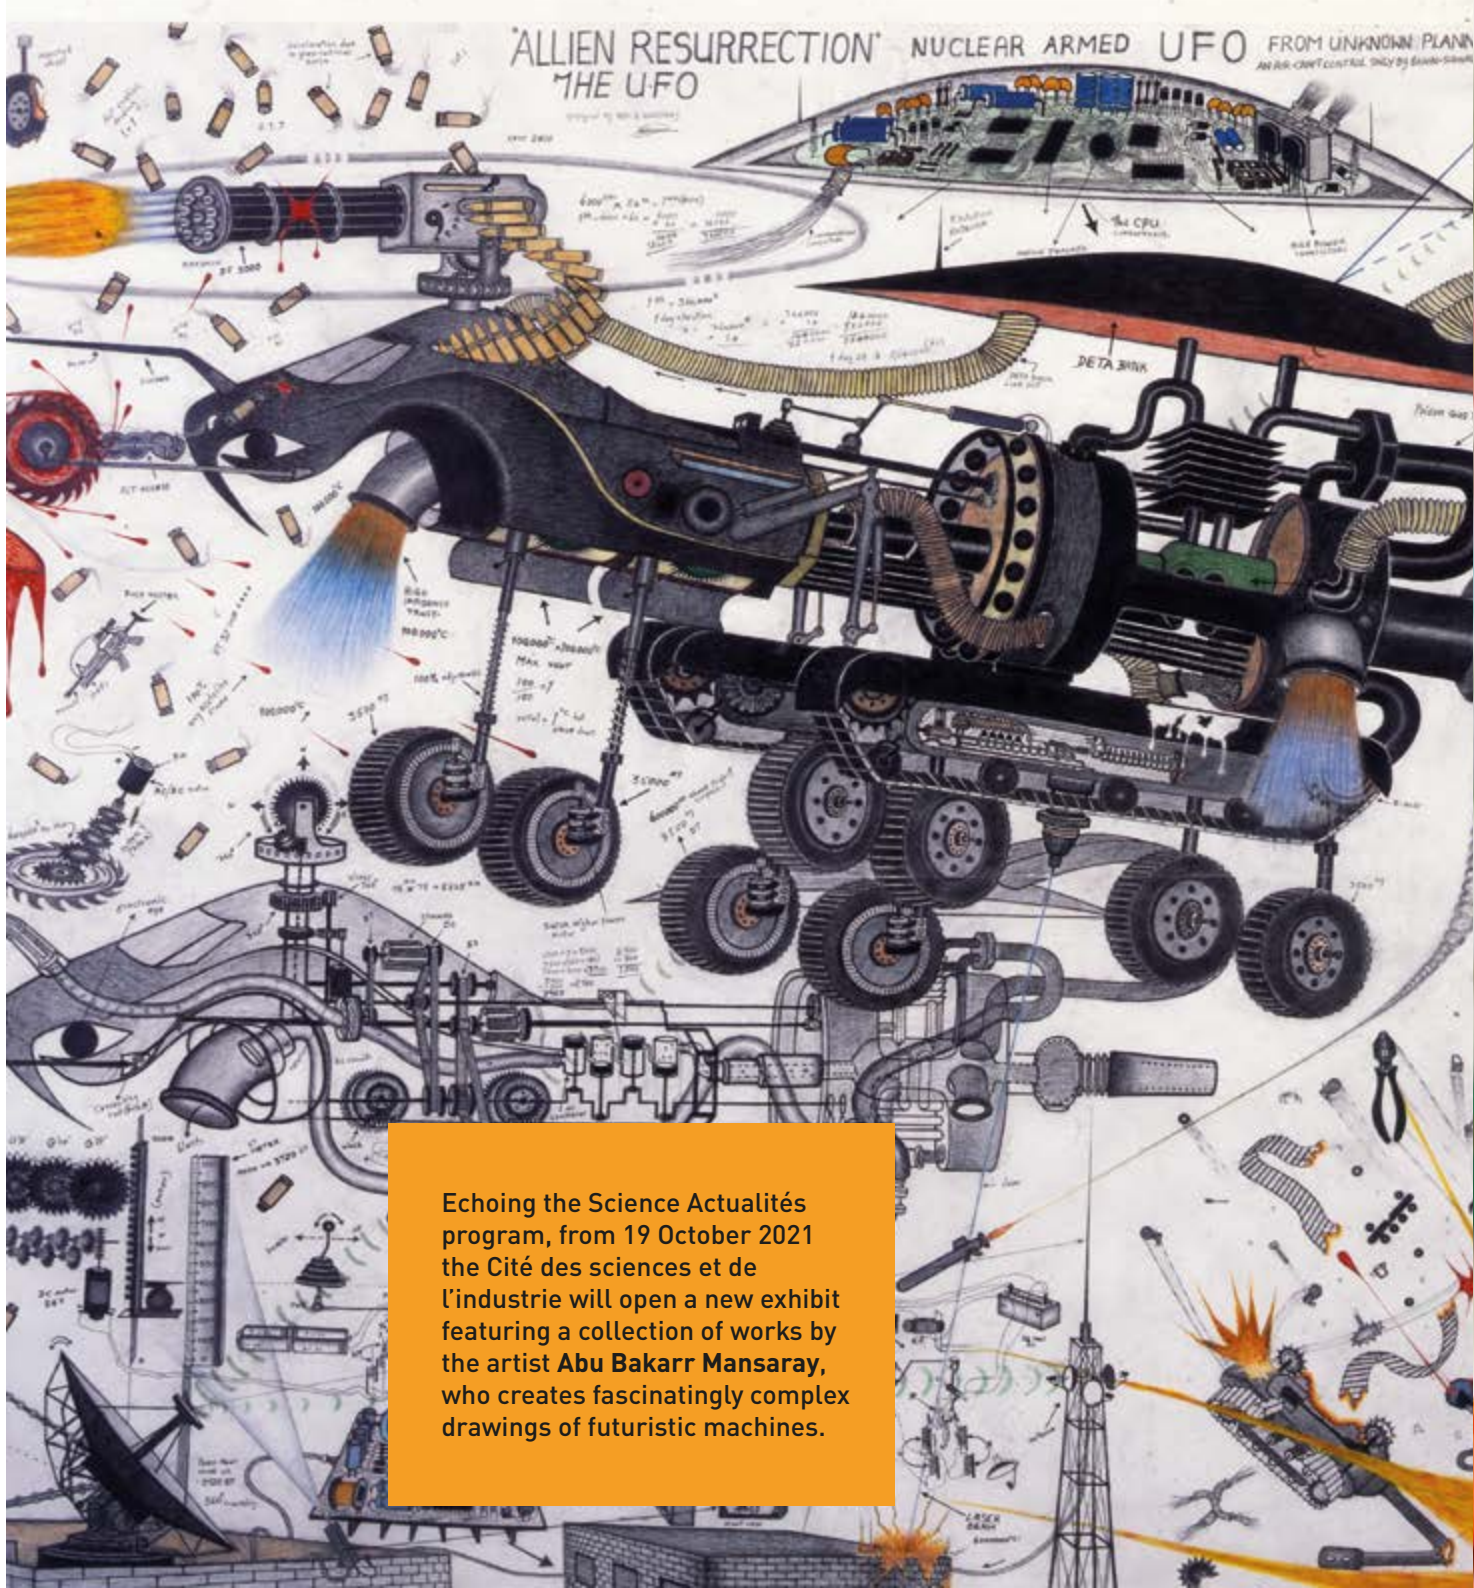

- From October 2021, Science Actualités will present “Topical issues” dedicated to hydrogen, the emergence of a new submarine volcano in Mayotte, the latest three-dimensional map of the universe, as well as looking at race as a scientific subject.

- In 2022, to mark France’s Presidency of the Council of the European Union, there will be a special edition of Science Actualités dedicated to European topics.

Some content of Sciences Actualités is available online.

Artwork by Abu Bakarr Mansaray for Science actualités [Science News] © Jean Pigozzi Collection

Echoing the Science Actualités program, from 19 October 2021 the Cité des sciences et de l'industrie will open a new exhibit featuring a collection of works by the artist **Abu Bakarr Mansaray**, who creates fascinatingly complex drawings of futuristic machines.

# #LaScienceEstLà

The Covid-19 epidemic has brought science to the fore. During lockdown, Universcience launched a digital offering, “Science is here”, made up of online content, workshops and lectures, so that #CultureChezNous and #LaScienceEstLà could continue.

This season’s program:

- Online demonstrations,
- online science courses,
- Cité des enfants workshops at home...

# TRAVELLING EXHIBITIONS AND EVENTS

## About love (De l'amour)

❶ Quai des Savoirs in Toulouse, until 7 November 2021.

## Fire (Feu)

❷ Espace des sciences in Rennes, until 2 January 2022.

## Cold (Froid)

❸ Cantonal Museum of Geology in Lausanne, Switzerland from 17 June 2021 to 23 January 2022.

## The Voice (La Voix)

❹ Cité des Télécoms, Pleumeur-Bodou until 31 December 2021.

## Microbiota, based on the book "Gut, the inside story of our body's most under-rated organ" (Microbiote, d'après le charme discret de l'intestin)

❺ Heureka, Vantaa, Finland until 24 October 2021.

❻ Experimenta, Heilbronn, Germany from 2 December 2021 to 1 May 2022.

## Edged on (Risqué)

❼ Guyana Space Centre in Kourou – Guyana, until 31 October 2021.

❽ CCSTI in Chambéry, from 2 October 2021 to 26 February 2022.

## Electrostatic (Electrostatique)

❾ CCSTI La Turbine, Annecy, until 5 July 2021.

## What's new in the Middle Ages? (Quoi de neuf au Moyen Âge ?)

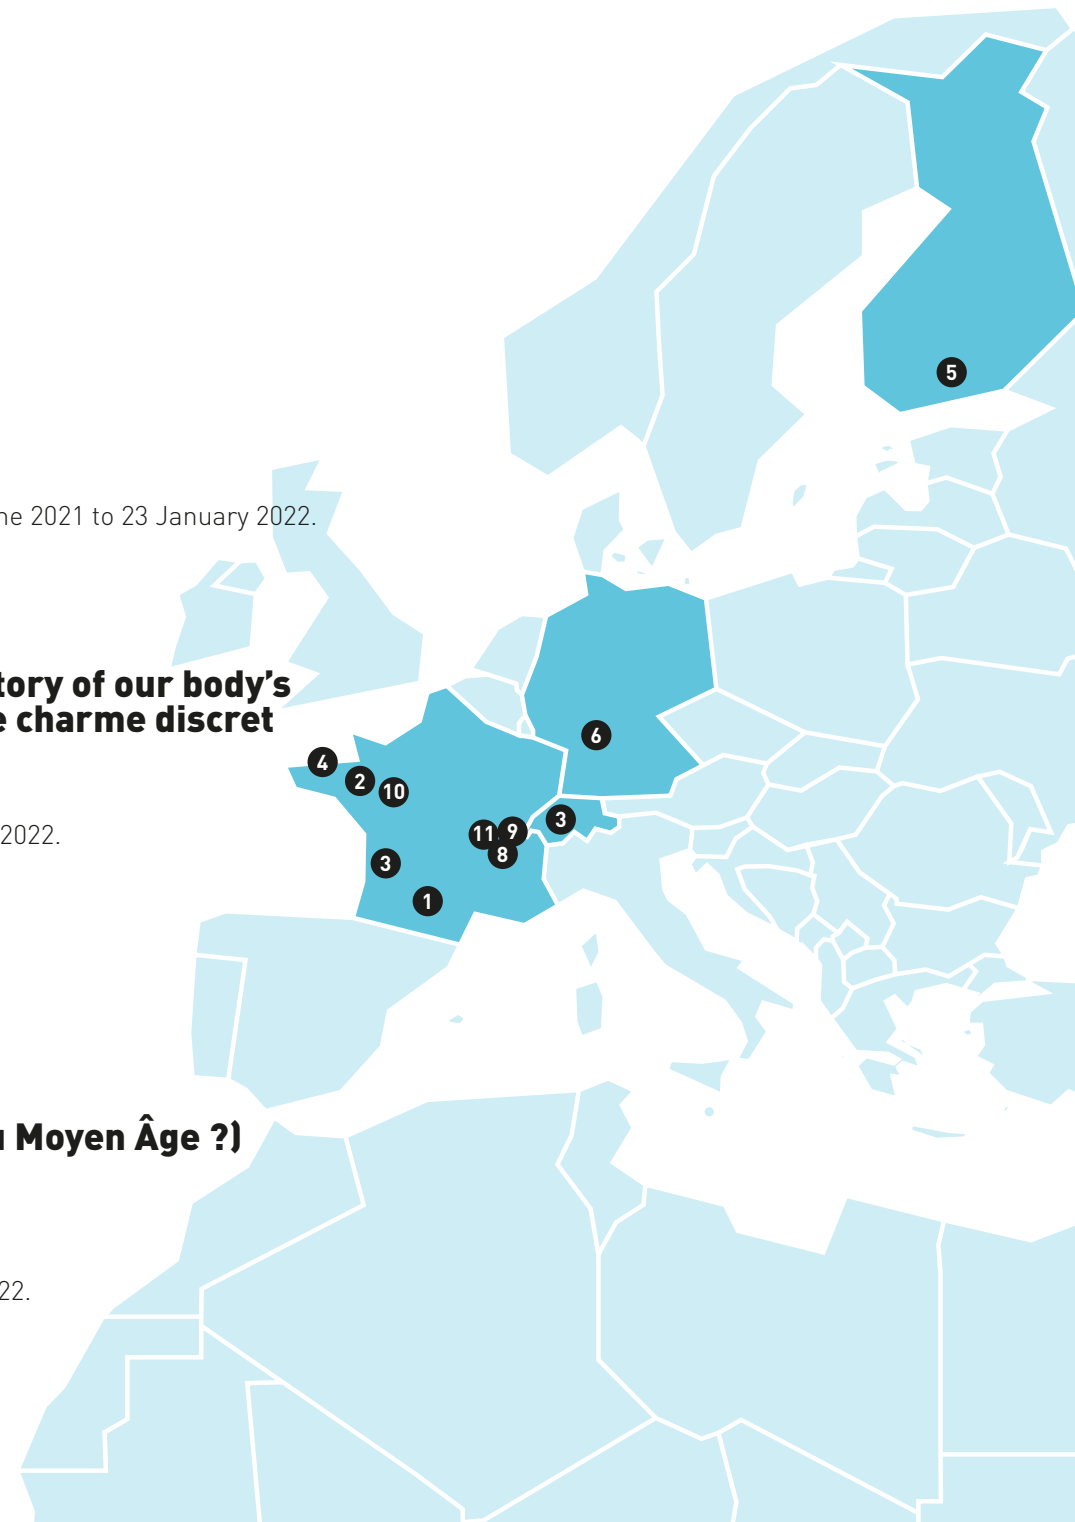

❿ Château d'Angers, until 14 November 2021.

## Special effects (Effets spéciaux)

⓫ Pôle Pixel in Villeurbanne, from 17 September 2021 to 27 March 2022.

.....

This program features a range of Universcience exhibitions which will tour around France and abroad. Others to follow throughout the season.
